PROFILE

I'm 24 years old, born on Madeira Island in Portugal. I'm a detail-oriented person with good communication skills. As a semi-professional football player, I have become a great team player and learned the importance of discipline, dedication, and hard work. A very curious person, always looking to learn about new things. At this moment, my priority is to expand my knowledge about JavaScript and write clean code.

SKILLS

Languages

- HTML
- CSS/SCSS
- JavaScript

Frameworks

- Angular
- Spring Tool Suite

Test

- SoapUI

Other

- Git
- Bootstrap
- SQL

Foreign Language

- English

EXPERIENCE

Vega IT - Internship

- Creating Gulp tasks
- Learning and implementing new plugins
- Raising awareness of the importance of HTML semantics
- Looking at the bigger picture while developing (ex. Building websites for people with visual disabilities...)

EDUCATION

FTN Informatika

- Frontend Development course
 - Final test result 86%
 - Web-based system architecture and HTTP protocols
 - Basic HTML concepts and advanced HTML 5 components
 - Basic and advanced CSS constructions including Bootstrap, and SCSS script language.
 - General principles of web design and developing user-friendly pages
 - JavaScript fundamental elements include objects, functions, DOM, and Event listeners.
 - Typescript as an upgrade from JavaScript
 - Knowledge of object-oriented programming
 - Angular framework, a good understanding of modules, creating components, services, and routing to the working with external libraries

Faculty of Technical Science, Novi Sad

- Engineering management with a focus on Information Management

PERSONAL PROJECTS

Digital Studio

- Project developed for requirements of a local digital studio using BEM naming with flex and grid system
- Page is pixel perfect and contains SASS preprocessor which allows you to effortlessly maintain page with the support of variables and mixins

Adopting animals

- Project designed to help abandoned animals
- Routing components are the primal thing to this single-page application
- The application includes class models so data from a server could be consistent
- Services contain methods for getting, adding, and deleting data from an application
